

Inside the front cover (front door)

[TS-WXL](#)

Open the front cover

Insert the "Front cover opening / closing key" into the "Hard disk replacement key cylinder" and turn it 90 degrees counterclockwise to open the front cover.

HDD cartridge

HDD is SAMSUNG's HD502HI

HDD cartridge is exactly the same as LS-QL.

KURO-NAS / X4 and KURO-BOX / T4 should have been this cartridge as well.

Large radiation fins for CPU?

Large fins behind HDD cartridge.

Probably for heat dissipation of CPU.

The LS-XHL using the same CPU had no fan or fin, but the KURO-SHEEVA had a heat sink and the TS-WXL finally had a large fin.

△ I don't like that the caution sticker is distorted.

To the left is an attractive D-SUB 9-pin connector. It says "Not used in this product".

TS-WXL
