

The key is in the way

[TS-WXL](#)

To open the front cover, the key must be inserted into the key cylinder and turned 90 ° counterclockwise. That is, the key must be inserted into the key cylinder of the front cover while the front cover is opened.

Well!

The nail behind the front cover was removed.

Now you can open the cover without the key.
You do not have to stab the key while it is open.

Petit hack complete!
