

Rebuild in MovableType background

[Debian TS-WXL](#)

MovableType is now working, so check the restructuring in the background.

Confirm manually

Start manually and check for errors

```
tswxl:~# cd /home/httpd/cgi-bin/mt ; tools/run-periodic-tasks
tswxl:/home/httpd/cgi-bin/mt#
```

There is no problem because nothing is in the queue.

Register with cron

```
tswxl:/home/httpd/cgi-bin/mt# crontab -e
:
:
tswxl:/home/httpd/cgi-bin/mt# crontab -l
# m h dom mon dow   command
*/5 * * * * nice /bin/sh /usr/local/sbin/fancontrol 2>/dev/null 1>/dev/null
*/10 * * * * nice /bin/sh /usr/local/sbin/lcdcontrol 2>/dev/null 1>/dev/null

0 3 * * * nice /bin/sh /usr/local/sbin/Backup 2>/dev/null 1>/dev/null

*/10 * * * * (cd /home/httpd/cgi-bin/mt ; tools/run-periodic-tasks) 2>/dev/null 1>/dev/null
tswxl:/home/httpd/cgi-bin/mt#
```

Check the queue once every 10 minutes and rebuild any articles that need to be built

patch

However, when I queue articles for testing, they don't rebuild them.

When I searched , the patch was released on
[movabletype.jp](#) .

I tried to patch ,,
Kurenahi rebuild. . . Troubled
