

Update to Firmware Updater Ver.1.30

[TS-WXL](#)

I forgot that [TeraStation X Series Firmware Updater Ver.1.30](#) was released.
There are quite a few bug fixes, so I'll update.

Currently, that is 1.06
? Isn't it 1.20?

Run updater

Execute tsx130.exe, launch
created C:\Documents and Settings\yasunari\Desktop\tsx-130\TS-X_FW1.30\TSUpdater.exe and
update without any problems.
