

Install unzip

[Debian](#) [TS-WXL](#)

If you try to extract a MovableType archive,

```
tswxl:/tmp# unzip MT-4_27-ja.zip
-su: unzip: command not found
tswxl:/tmp#
```

So, install unzip.

Which package should I install?

```
tswxl:/tmp# apt-cache search unzip
classpath-common-unzipped - clean room standard Java libraries - architecture independent files
cnews - simple news server for Usenet news
devscripts - scripts to make the life of a Debian Package maintainer easier
dictzip - Compression utility for dictionary databases
fcrackzip - password cracker for zip archives
libio-compress-bzip2-perl - Read and write bzip2-compressed files and buffers in perl
liborange-dev - development libraries for liborange
liborange0 - library to extract CAB files from self-extracting installers
orange - extracts CAB files from self-extracting installers
unzip - De-archiver for .zip files
zlib-bin - compression library - sample programs
libzzip-0-13 - library providing read access on ZIP-archives - library
libzzip-dev - library providing read access on ZIP-archives - development
zziplib-bin - library providing read access on ZIP-archives - binaries
tswxl:/tmp#
```

Unzip straight

Install unzip

```
tswxl:/tmp# apt-get install unzip
Reading package lists... Done
