

# ar and wget

## [TS-WXL](#)

---

Check if there are ar and wget in RAM Root of TS-WXL.

Anyway, ar does not seem to be wget.

```
root@TS-WXL-EM3B3:~# which wget
/usr/bin/wget
root@TS-WXL-EM3B3:~# wget
BusyBox v1.7.0 (2007-10-15 19:49:46 IST) multi-call binary
```

```
Usage: wget [-c|--continue] [-s|--spider] [-q|--quiet] [-O|--output-document file]
          [--header 'header: value'] [-Y|--proxy on/off] [-P DIR]
          [-U|--user-agent agent] url
```

Retrieve files via HTTP or FTP

Options:

- s Spider mode - only check file existence
- c Continue retrieval of aborted transfer
- q Quiet
- P Set directory prefix to DIR
- O Save to filename ('-' for stdout)
- U Adjust 'User-Agent' field
- Y Use proxy ('on' or 'off')

```
root@TS-WXL-EM3B3:~# which ar
/usr/bin/ar
root@TS-WXL-EM3B3:~# ar
BusyBox v1.7.0 (2007-10-15 19:49:46 IST) multi-call binary
```

```
Usage: ar [-o] [-v] [-p] [-t] [-x] ARCHIVE FILES
```

Extract or list FILES from an ar archive

Options:

- o Preserve original dates
- p Extract to stdout
- t List
- x Extract
- v Verbose

```
root@TS-WXL-EM3B3:~#
```

There are both.

That means debootstrap is possible!
