Copy web data

[Debian](#) [TS-WXL](#)

Copy the web data of the outgoing server to check the operation.

GUIDE

Before that, on which GID does apache work?

```
yasunari@tswxl:/etc/apache2$ grep -i group *
apache2.conf:# The configuration directives are grouped into three basic sections:
apache2.conf:Group ${APACHE_RUN_GROUP}
envvars:export APACHE_RUN_GROUP=www-data
yasunari @ tswxl: / etc / apache2 $
```

Change grup

```
tswxl:~# cd /home/httpd/
tswxl:/home/httpd# ls
cgi-bin  html
tswxl:/home/httpd# chgrp www-data *
tswxl:/home/httpd# chmod g+w *
tswxl:/home/httpd#
```

Set the set gid bit in the directory

```
tswxl:/home/httpd# chmod g+s *
tswxl:/home/httpd# ls -al
total 0
drwxr-xr-x 4 root root      31 Jun  1 22:58 .
drwxr-xr-x 4 root root      33 Jun  1 22:58 ..
drwxrwsr-x 2 root www-data  6 Jun  1 22:58 cgi-bin
drwxrwsr-x 2 root www-data  6 Jun  1 22:58 html
tswxl:/home/httpd#
```

Make yasunari a member of www-data

```
tswxl:~# adduser yasunari www-data
Adding user `yasunari' to group `www-data' ...
Adding user yasunari to group www-data
Done.
tswxl:~# exit
logout
yasunari @ tswxl: ~ $
```

make a copy

Log in again with yasunari, regain group permissions, and copy with rsync

```
yasunari@tswxl:~$ umask 2
yasunari@tswxl:~$ rsync -rtvpogtlH rsync://192.168.1.3/httpd/html /home/httpd
        :
        :
```

```
yasunari@tswxl:~$ rsync -rtvpogtlH rsync://192.168.1.3/httpd/cgi-bin /home/httpd
        :
yasunari @ tswxl: ~ $
```

Verification

Check that the static page with access to http://192.168.2.70/ is displayed,
and access to http://192.168.2.70/cgi-bin/BBS/eztree.cgi, BBS of CGI operation Make sure you do. . . . .
It is displayed but cannot be posted. . .
