Sisense   **All company jobs**

Sisense is a powerful data and analytics platform built to empower analytics builders and distribute insights to everyone across the organization.Our product:Sisense has built its business by delivering the only modern, cross-cloud data analytics platform that covers the entire process—from raw, complex data to machine learning to business insights.

16 September 2020

Senior Quality Assurance Engineer (inactive)

 Kyiv

At Sisense, we are on a mission to empower modern data teams to deliver insights to everyone inside and outside their organizations. We bring "power to the builders" by enabling our customers to answer complex questions with data and drive the best business outcomes possible.

WHY YOU SHOULD JOIN OUR QA TEAM:

You'll be surrounded by strong QA engineers, a team that stands guard over the quality of a huge product and is passionate about being a technological leader. You will be surprised at the complexity of tasks that require an analytical mindset and a good imagination to solve. At Sisense your journey of acquiring new professional skills and technology is endless.

WHY YOU SHOULD JOIN SISENSE?

- **We live our values.** We care about each other, the technology we create, and the customers we support. We know we're constantly learning and improving, and look forward to sharing insights and techniques with each other.

- **We have interesting customers.** We support the Red Cross with dashboards about supplies, help a suicide prevention hotline with SQL+Python ML analysis, and enable Tinder to make better matches.

- **We are our own customers**. We're heavy users of the features we build and have an intuitive understanding of what makes data teams so special and successful.

- "**You have unlimited questions remaining**" is core to our team's philosophy. We are excited about learning and sharing together, and work hard to make sure that everyone is set up for success.

ABOUT SISENSE:

- We're a passionate, venture-funded team with more than 2000 customers, including Nasdaq, GE Healthcare, Honda, Verizon, and Philips

- We believe strongly in a data-driven approach to all that we do. We're constantly measuring and optimizing everything about the business.

- We have close relationships with our customers.

- We've been recognized by Comparably, Glassdoor, and Gartner for our amazing company culture.

- We have super high customer retention — better than best in class SaaS companies.

- We believe strongly in a data-driven approach to all that we do. We're constantly measuring and optimizing everything about the business.

- We've been recognized by Comparably, Glassdoor, and Best Places to Work for our amazing company culture.
